	4-Port Dual Directional Coupler employs two, 3-Port Uni-Directional Couplers, internally connected, in					
	tandem, providing measurement of both forward and reverse power. Ideal for simultaneouly monitoring a system's forward and reverse power and for reflectometer measurements. Unlike the Bi-Directional Coupler, the directivity of the					
	Dual Direction	Dual Directional Coupler is unaffected by the loads on the coupled ports.				
	Features:

Werlatone[®] Broadband Dual, Uni, and Bi Directional RF Couplers are designed to tolerate the most stringent operating conditions associated with military and EMC testing environments. Many of our RF Directional Couplers, designated Mismatch Tolerant[®], will operate continuously, at rated power, into a severe load mismatch condition. Our multi-octave Directional Couplers maintain exceptional coupling flatness, directivity, VSWR, and insertion loss.
